EDUCATION

Southern Connecticut State University

M.S. Software Engineering

New Haven, CT

Expected May 2028

Southern Connecticut State University

B.S. Computer Science (GPA: 3.5)

New Haven, CT

Expected December 2026

Relevant Coursework: Data Structures & Algorithms, Database Systems, Software Engineering, Software Quality Assurance, Discrete Mathematics

Honors & Awards: Dean's List (2022–2026), Academic Excellence in Programming Award (May 2025)

Leadership & Involvement: Presidential Scholar Ambassador, SCSU; STEM Mentor, ACCESS Educational Services

Certifications & Training: AWS Cloud Technical Essentials, Google Project Management Fundamentals

CORE QUALIFICATIONS

Python | TypeScript | JavaScript | SQL | Node.js | React | Next.js | PostgreSQL | REST APIs | System Design | Data Structures & Algorithms | CI/CD | Unit Testing | Integration Testing | Git/GitHub | AWS | Agile | Code Review

PROFESSIONAL EXPERIENCE

Software Developer

Mar 2026 – Present

WigVerse

Remote

- Architected and delivered 2 production full-stack applications (WigVerse, AmJes Couture Medical Wear Studio), designing normalized database schemas and RESTful APIs using Next.js, TypeScript, and PostgreSQL.
- Owned end-to-end feature development from requirements to release, delivering checkout flows, payment processing, and role-based access systems across both live client deployments.

Technical Support Engineer, Systems & IAM

July 2025 – Present

SCSU Technology Department

New Haven, CT

- Diagnosed and resolved 700+ technical issues spanning authentication workflows, application access failures, software defects, and endpoint misconfigurations across a large-scale university environment.
- Led identity and access management through Azure Active Directory, administering MFA, account lifecycle policies, and access controls for thousands of university users.
- Authored technical runbooks and escalation documentation, reducing resolution time for recurring issues and improving knowledge transfer across the IT team.

Systems & Deployment Intern

May 2024 – July 2024

Housatonic State College Technology Department

Bridgeport, CT

- Configured and deployed 60+ institutional computers through a repeatable provisioning process covering hardware validation, OS setup, endpoint configuration, and readiness testing for partner high schools.
- Created standardized deployment documentation and troubleshoot hardware and software issues, reducing configuration errors and accelerating the distribution workflow for future deployments.

SOFTWARE DEVELOPMENT PROJECTS

KaS Finance – Finance Tracking Platform

Live Site | GitHub

Next.js, TypeScript, PostgreSQL, REST APIs, CI/CD, Unit Testing, Integration Testing, Vercel

- Designed and shipped a production finance platform with 20+ active users, architecting a normalized PostgreSQL schema, JWT-secured REST API, and AI-powered assistant with automated CI/CD on Vercel.
- Built 40+ unit and integration tests across transaction, authentication, and API flows; resolved user-reported bugs via a built-in support feature, maintaining stability across continuous releases.

Nurse Scrubs Marketplace – E-Commerce Platform

Live Site | GitHub

Next.js, TypeScript, SQL, Payments, Customer Accounts, Admin Dashboard, Order Management

- Led full-stack development of a client e-commerce platform replacing a manual WhatsApp-based sales process with a scalable ordering system for nurses and nursing students in Accra, Ghana.
- Delivered a multi-role system with storefront, secure checkout, payment processing, order tracking, and admin dashboard — taking the product from zero to live and processing 40+ orders in production.

Owl Diary – Journaling Platform

Live Site | GitHub

React, Node.js, Express, Authentication, Role-Based Access Control

- Implemented secure authentication, RBAC, and backend API routes for a team-built journaling platform, enabling safe data management for 20+ students per semester in SCSU's Women's and Gender Studies program.
- Coordinated deployment with university IT onto managed servers, enabling continued use by 20+ students per semester with a handoff process designed for future course cohorts.
